### **AMENDMENTS TO THE CLAIMS**

This listing of claims replaces all prior versions, and listings, of claims in the application:

#### **Listing of Claims:**

1. (Amended) In a video receiver that is coupled to a display device, the video receiver configured to locally receive a stream that includes a plurality of video segments, a method of locally processing remotely issued instructions contained in the stream so that the video receiver can be used for targeting the plurality of video segments based on local information accessible to the video receiver and based on the remotely issued instructions, the method comprising the following:

locally monitoring state and user behavior characteristics associated with the video receiver;

locally storing the characteristics only at the video receiver;

locally receiving at the video receiver a plurality of video segments from the stream;

locally receiving at the video receiver remotely issued executable instructions from the stream, the remotely issued executable instructions configured to cause the video receiver to select a particular video segment from among the plurality of video segments based on the locally stored characteristics when the remotely issued executable instructions are locally processed by a processor at the video receiver;

locally processing the remotely issued executable instructions using the locally stored characteristics to cause the video receiver to select the particular video segment; and

causing the selected particular video segment to be displayed on the display device.

Application No. 10/001,298  
Amendment "A" dated January 23, 2006  
Reply to Office Action mailed December 1, 2005

2. (Original) A method in accordance with Claim 1, wherein:  
processing the executable instructions to cause the video receiver to select the video segment comprises processing the executable instructions to cause the video receiver to select a video advertisement; and  
causing the video segment to be displayed on the display device comprises causing the video advertisement to be displayed on the display device.
3. (Original) A method in accordance with Claim 1, wherein:  
causing the video segment to be displayed on the display device comprises causing the video segment to be displayed on the display device in a window.
4. (Original) A method in accordance with Claim 3, further comprising:  
displaying material outside of the window.
5. (Original) A method in accordance with Claim 4, wherein:  
displaying material outside of the window comprises displaying television programming outside of the window.
6. (Original) A method in accordance with Claim 4, wherein:  
displaying material outside of the window comprises displaying network resources outside of the window.
7. (Original) A method in accordance with Claim 4, wherein:  
displaying material outside of the window comprises displaying Web content outside of the window.
8. (Original) A method in accordance with Claim 1, further comprising:  
causing a still picture to be displayed on the display device when the video segment is not being displayed on the display device.

Application No. 10/001,298  
Amendment "A" dated January 23, 2006  
Reply to Office Action mailed December 1, 2005

9. (Original) A method in accordance with Claim 8, further comprising:  
receiving the still picture from the stream.
10. (Original) A method in accordance with Claim 8, wherein:  
causing a still picture to be displayed on the display device in the window when  
the video segment is not being displayed on the display device comprises causing a  
banner advertisement to be displayed on the display device in the window when the video  
segment is not being displayed on the display device.
11. (Original) A method in accordance with Claim 8, wherein the executable  
instructions are first executable instructions, the method further comprising:  
receiving second executable instructions from the video stream, the second  
executable instructions configured to cause the video receiver to select the still picture  
from among a plurality of still pictures based on the locally stored characteristics when  
the second executable instructions are processed by a processor; and  
processing the second executable instructions to cause the video receiver to select  
the still picture.
12. (Original) A method in accordance with Claim 1, further comprising:  
caching the plurality of video segments as they are received.
13. (Original) A method in accordance with Claim 12, further comprising:  
releasing the cache memory associate with a particular video segment if the video receiver  
determines that the particular video segment is not to be displayed.
14. (Original) A method in accordance with Claim 1, wherein causing the video  
segment to be displayed on the display device comprises:  
causing the video segment to be displayed as the video segment is being received  
from the video segment, wherein the executable instructions contain a trigger that

Application No. 10/001,298  
Amendment "A" dated January 23, 2006  
Reply to Office Action mailed December 1, 2005

coordinates the start of display of the video segment with the time that the video segment is received by the video receiver.

15. (Original) A method in accordance with Claim 1, wherein receiving a plurality of video segment from the video stream comprises:

receiving the plurality of video segments from a plurality of video streams; and  
switching display between the plurality of video streams based on the executable instructions.

16. (Original) A method in accordance with Claim 1, wherein the video stream is a unidirectional video stream.

17. (Original) A method in accordance with Claim 1, wherein the locally stored characteristics includes channel subscription information.

18. (Original) A method in accordance with Claim 1, wherein the locally stored characteristics include historical information about channels tuned to.

19. (Original) A method in accordance with Claim 1, wherein the locally stored information includes historical information about pay per view purchases.

20. (Original) A method in accordance with Claim 19, wherein the historical information about pay per view purchases includes the identification of the last pay per view purchase.

21. (Original) A method in accordance with Claim 1, wherein the locally stored information includes historical information about advertisements displayed.

22. (Original) A method in accordance with Claim 21, wherein the historical information about advertisements displayed comprises an identifier identifying at least some of the advertisements previously displayed.

Amendment "A" dated January 23, 2006  
Reply to Office Action mailed December 1, 2005

23. (Original) A method in accordance with Claim 22, wherein the historical information about advertisements displayed comprises a time that the corresponding advertisement was last displayed.

24. (Original) A method in accordance with Claim 1, wherein video receiver locally stores the characteristics without revealing the characteristics outside of the video receiver.

25. (Amended) A computer program product for use in a video receiver that is coupled to a display device, the video receiver configured to locally receive a video stream that includes a plurality of video segments, the computer program product for implementing a method of locally processing remotely issued instructions contained in the stream so that the video receiver can be used for targeting the plurality of video segments based on local information accessible to the video receiver and based on the remotely issued instructions, the computer program product comprising a computer-readable medium having stored thereon computer-executable instructions for performing the following:

locally monitoring state and user behavior characteristics associated with the video receiver;

causing the characteristics to be locally stored only at the video recorder;

detecting the receipt of a plurality of video segments from the video stream;

using the locally stored characteristics, processing remotely issued executable instructions received at the video receiver from the video stream, the remotely issued executable instructions configured to cause the video receiver to select a particular video segment from among the plurality of video segments based on the locally stored characteristics when the remotely issued executable instructions are locally processed by a processor at the video receiver; and

causing the video segment to be displayed on the display device.

26. (Original) A computer program product in accordance with Claim 25, wherein the computer-readable medium is one or more physical storage media.

27. (Cancelled)
